

Building Team RFS February 11, 2014

Present: Dan Huisjen, Ralph Chapman, Harry Madson, Paul Welsh, Gail Vencill, convener

The main topic on the agenda was mold remediation.

It had previously been decided to go ahead with the use of ozonators to assist in mold remediation. It is necessary to have a block of time when the building is not in use for the process to take place. The window of opportunity before us is February 19 – March 1, 2014.

\*Ralph Chapman will order 2 ozonators (Sanctuary and basement) to be used during the time period Feb. 19-March 1. Ralph will be reimbursed as soon as the dollar amount is known. The ozonators will be delivered to Ralph's home. Ralph and Dan will set up the system

\*In preparation for use of the ozonators the chairs, furniture, curtains, pictures all need to be moved to the dining area. Gail will organize that preparation, seeking help from those attending the movie program on Sunday, February 18. Ralph will obtain plastic and cover the piano. Harry will contact Tony Ferrara about removing the broken TV from the sanctuary to the dump.

\*Gail will make laminated signs to post on the building during the time of the ozonator use. **NO ONE CAN ENTER THE BUILDING DURING THE TIME OF REMEDIATION.** Doors will be secured and a message sent to the email list and posted on the website.

Additional business:

Gail reported that an architect who recently was in the building suggested Orange Citrosolve for cleaning/finishing the floor. More discussion needs to take place. Gail will contact Eric Chase, Bruce Sanki and Mike Hewes, area architects, to request that they visit the sanctuary and give their opinions as to ways to proceed. The visit would have to take place after March 1 due to use of the ozonators.

The next 3 in 1 meeting will be Tuesday, Feb 18, 4pm for a pot luck dinner at the Ferrara's. Team member spouses also invited.

Next Building Team meeting Tuesday, March 11, 5pm at RFS. Agenda will include:

Heat Pump—Ralph and Dan to present information

Flooring – Gail, reports from architects

Minutes provided by Gail Vencill
